

Dear Friends!

We are celebrating our 15th Anniversary this year! While the very first students of our school from fifteen years ago have already grown up, our recently joined students will meet their friends and teachers again this year. If you are just starting your journey with us, please know that all of our experience, knowledge and care is here for you and your children! We are happy to open our doors again for another school year and welcome you to our school!

Language Development (3+)

Play-based class for children who already speak Russian, even if not very well. We will do a lot of playing, talking, and listening. The main goal of the class is to develop speech and vocabulary in order to learn to communicate in Russian.

Russian Language

Children will plunge into the world of spelling, grammar, rules, tongue twisters, riddles, fairy tales, poetry, culture, and traditions. The goal of this class is to let the kids experience the richness and beauty of the Russian language and to inspire a love for it that our teachers and parents share.

Russian Literature

Students will get acquainted with works of Russian literature, learn about different genres, practice various techniques of reading and retelling stories, expand their vocabulary and even become authors themselves.

Math and Logic

The lessons are based on the author's methodology and carefully designed tasks, most of which have a game form. Not only will we solve problems, but also measure, weigh, solve puzzles, collect patterns and shapes from constructors and play logic games. Proposed solutions will be discussed in a way that will allow kids to learn not only to give an answer, but also to reason, substantiate their answer and reflect on the problem.

World Around Us

Nature and weather. Alive and inanimate. Food chain and life cycle. Evolution and the kingdoms of living nature. Kids will find answers to the most important questions about the world around them.

Science Club (8+)

Introduction to Engineering, Fundamentals of Physics, Chemistry and Astronomy. Everything you need to know to fly into space and more.

Art

Our goal is to teach children to see the world around them through the eyes of an artist, such as form, nuances of light and shadow, organization of space and color.

Creativity for Little Ones

In this class, kids will draw, glue, build, sculpt, design, experiment with tools and materials, mix colors, combine shapes, build compositions, and work together and discuss their creations.

Craft (6+)

Craftsmanship lessons – we will work on various exciting age-appropriate DIY projects.

Russian Folklore

Kids will learn about various aspects of Russian traditional life, from the structure of ancient cities, a peasant hut and a royal palace, to ancient weapons, costume elements, folk crafts, as well as myths and legends.

Music (4+)

Who doesn't love to sing, dance and clap their hands?

Theater (7+)

The theater returns this year! Exciting activities and acting exercises will help children recognize and communicate their emotions, improve pronunciation and vocabulary, and work on character development.

Russian as a Second Language (RSL)

A program for children and adults who want to start learning Russian.
